

# THE PHILOSOPHY OF VanderEnde Group

## 2025-2030

In a world facing increasing challenges around water management and food safety, we strive to play a leading role in innovating and delivering sustainable and circular solutions. Our philosophy is based on the conviction that **distinctiveness**, **specialist knowledge** and **innovative thinking** are key prerequisites for meeting these global challenges. We believe that the key to success lies in understanding not only the immediate but also the latent needs of our customers. By continually investing in the development of new products and technologies, we are committed to making a positive and lasting impact on both society and the environment.

### Distinctiveness

We combine technological advances with an understanding of our customers' unique needs. This enables us to create solutions that not only work today, but remain relevant tomorrow. Our commitment to perfection and customer-oriented approach make us a reliable partner in water management.

### Specialist knowledge

We are constantly developing and immersing ourselves in new trends and technologies to stay ahead. For us, knowledge is not something static, but an ongoing process of learning, application and innovation.

### Innovative thinking

We strive to continuously develop new technologies and methods that make our water solutions more efficient, effective and sustainable. For us, innovation means not only improving existing systems, but also anticipating future challenges.

### Our team values

Attention

Harmony

Decisiveness

### 'License to operate' values

Service
