# AEONPUMP

## Leading the Way in Innovative Pumping Solutions.

Van der Ende Group offers **durable**, **energy-efficient** and **powerful** Aeonpump pumps designed specifically for the tough demands in construction and infra. From **lithium-ion** and **hydrogen** pumps to **electric** and (Stage V) diesel pumps, a wide range of innovative pumps designed to meet the current and future needs of the market.

The Raptor 4" Li-ion, **the world's first battery-powered pump**, the Raptor 6" **Electric**, the solution for sewage water, for example, and the Raptor 4" D Lite, **the world's lightest sound-proof mobile pump**, set new standards in pumping solutions.

### SCREW TYPE IMPELLER

Super-efficient **Hidrostal** screw impeller pump for pumping dirty water containing sand and stones, with a very high **efficiency** of 74-82%

- ✓ Suitable for dirty water with solids
- ✓ Less cavitation
- ✓ Low energy consumption

### VACUUM PUMP

The self-priming vacuum pump is **reliable**, **water-resistant** and stands out due to its **low failure rate** and **long maintenance intervals**.

- ✓ Rust free
- ✓ Less maintenance
- ✓ 50% less energy consumption

### CANOPY

The lightweight galvanized steel frame is strong and robust, with a sound-insulating casing.

- ✓ Stackable
- ✓ Sound-insulating casing
- ✓ Plastic panels in any desired RAL color

- High quality components
- Long maintenance intervals
- Efficient Hidrostal pump
- Hatz motor Stage V
- Sound-insulating and lightweight casting
- Available as diesel-, electric- or lithium battery-powered
