

The Enmix Custom/Enmix frame is tailor-made for you.
 The container dimensions are important for determining the correct axle and blade length.

Attention: all measurements are inner measurements for a tapered container, enter measurements b2 and d2

h2 only to be used in case of inner support
 h3 (frame height) only to be used in case of existing frame

Comments:
 Mixer blade available in 2 sizes:
 - 1000mm for tanks >5m³
 - 750mm for tanks <5m³ and 60Hz

h* = axle length:
 <1000mm no bearing
 >1000mm frame with bearing
 >1500mm special bearing

Option (check if applicable) additional cost:
 Axle and blade made of AISI 316
