

BASIC ACCESS HATCHES

delivered immediately from stock (for horticulture)

Access hatches

Description

The basic access hatch is specifically manufactured for greenhouse horticulture and consists of one standard construction. The hatch is made entirely from aluminum checker plate. The basic access hatch can be mounted over a recess in a concrete deck plate or floor, among other things, and is available in the following sizes:

- o 500 × 500 mm
- o 800 × 800 mm
- o 1000 × 1000 mm

Different dimensions? Customized solutions are available.

The basic access hatch is part of a wide range of access hatches and hatches. Van der Ende Group manufactures the access hatches in-house, both standard and customized.

Construction of surface-mounted hatches

The basic access hatch is equipped with an aluminum tear plate frame (thickness 5/6.5 mm), a lock eye, and a toggle lock, including a toggle key. The access hatch is equipped with an aluminum 5-tear plate lid (thickness 5/6.5 mm). Furthermore, this access hatch is completely odor-proof with a neoprene sealing rubber. All rotating parts of the access hatch are made of stainless steel and fitted with nylon rings.

Advantages

- o very affordable
- o available from stock
- o extremely robust aluminum
- o completely odor-proof
- o includes mounting hardware for installing the cover hatch
