

Overzicht

Lucht- en wateraansluiting
Enbar U1 en U2 installaties

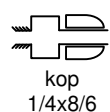

* = Bij het type U1 zijn er al magneetventielen in de Enbar zelf verwerkt, deze hoeven dan niet meer in de hoofdleidingen te worden geplaatst. In de rest van dit overzicht zijn de onderdelen die bij een U1 installatie komen te vervallen, met een sterretje aangegeven.

Aan dit overzicht kunnen geen rechten ontleend worden.
